# Level 3 Award in Residential, Commercial and Industrial Electric Vehicle Charging Equipment Installation
603/7636/3

## Qualification aim

This qualification aims to provide learners with expert guidance in the knowledge and understanding of Electric Vehicle charging equipment installation in a residential, commercial and industrial locations.

## Qualification introduction

The learner will be required to understand, identify and apply statutory regulations and organisational safety requirements in the electrical vehicle charging point environment. It allows learners to learn, develop and practise the skills required for employment in the electrical vehicle charging point installation category.

The learner's responsibilities will require them to comply with all relevant statutory and organisational policy and procedures for health and safety in the workplace. The learner must act in a responsible and safe manner at all times and present themselves in the workplace suitably prepared for the activities to be undertaken. The learner will be expected to report any problems with health and safety issues, to the relevant authority.

## Assessment

In order to achieve this qualification a learner must complete the single unit as mandatory. The assessment criteria determine the standard required to achieve each unit and allow for a variety of assessment methods to be used as appropriate to the environment the qualification is delivered in. There is no examined assessment element in this qualification.

## Progression

On completion of this qualification learners will be prepared to progress to higher level qualifications and possibly more specific, technical activities in related industries.

## Achievement

Learners must achieve a total of 2 credits, by completing the one mandatory unit.
